PROJECTS

COSMETIC E-COMMERCE WEBSITE AND APP

Dec 2024 - Apr 2025

- Team Size:** 2 | **Role:** Team Leader, Frontend Developer
- Responsibilities:** Responsible for designing and developing responsive user interfaces for both web and mobile platforms using ReactJS and React Native. Integrated RESTful APIs to ensure seamless communication between frontend and backend. Focused on delivering a smooth, performant, and accessible user experience across devices.
- Technology:** ReactJS, React Native, NodeJS, Expo, JavaScript, MongoDB, Postman, Figma, Axios, TensorFlow, Python, Flask.
- Description:** Developed responsive web and mobile interfaces for a comprehensive e-commerce platform. Implemented key features including user authentication (OTP, Google OAuth), product management, advanced search and filtering, shopping cart, and online payments (MOMO). Designed and integrated detailed order management, customer reviews, wishlist functionality, and a chatbot for personalized support. Built and consumed RESTful APIs for user, order, and analytics management. Led UI development with a strong emphasis on performance, accessibility, and user experience.

LAPTOP E-COMMERCE WEBSITE AND APP

Sep 2024 - Dec 2024

- Team Size:** 5 | **Role:** Frontend Developer
- Responsibilities:** Developed user interfaces for product detail, shopping cart, and order pages on both web and mobile platforms using ReactJS and Flutter. Integrated RESTful APIs to enable smooth data interaction between frontend and backend services.
- Technology:** React JS, Flutter, Node JS, Express JS, Fetch, MongoDB, RESTful API.
- Description:**Built web and mobile applications for an e-commerce platform featuring full functionalities, including product search and browsing, cart management, promotions, purchasing, online payments (VNpay), order tracking, chatbot support, order lookup, and product reviews. The system also includes an admin dashboard for product CRUD operations, user and order management, statistical reports, and comment moderation.

WEBSITE FASTFOOD DELIVERY (Jollibee clone)

Jul 2024 - Sep 2024

- Role:** Full-stack Developer
- Technology:** React JS, Node JS, Express JS, MongoDB, RESTful API
- Description:** Developed an online food ordering platform inspired by Jollibee. Built interactive user interfaces using ReactJS, allowing users to search and filter products, view menus, add items to cart, apply promotions, and complete purchases with online payments. The admin dashboard allows managing products, users, and orders, along with generating basic statistics.
